

Do you love birds? Then use LoveBirds all-natural birdbath, fountain and small pond cleaner regularly for crystal clear, healthy water. Non-toxic formula supplies 5 carefully selected strains of beneficial bacteria that biologically clean your birdbath, keeping the water healthy and safe for your feathered friends without the need for harsh chemicals. The living bacteria in LoveBirds will establish themselves in your birdbath, preventing colonization by potentially harmful bacteria. No bird lover wants their birdbath to make the birds sick, so use LoveBirds regularly and relax. LoveBirds is completely safe for all birds, plants, wildlife, pets, and people.

- All-season liquid formula
- Reduces sludge, prevents undesirable growths
- Eliminates odors and keeps water clear
- Reduces maintenance chores
- Safe for birds, pets, wildlife, plants and people

**LoveBirds Birdbath Cleaner** all-natural cleaner for birdbaths, fountains and small ponds supplies 5 strains of water cleaning and sludge removing bacteria, in a value-priced formulation designed for year round use. Our proprietary fermentation process results in a product that reduces sludge, odors and unsightly growths to keep water clear, clean and safe for your feathered friends. Also effective for fountains and small ponds under 100 gallons.

**APPLICATION:** Use year-round. Shake well before using. For a new birdbath or for cleaning a dirty one, add one teaspoon. For routine maintenance, add 1/2 to 1 teaspoon weekly. May be re-treated as necessary.

**Product:** LoveBirds Birdbath Cleaner

**Category:** Additives and Supplements, Ponds

**Packaging:** Available in 4 and 8 ounce plastic bottles

**Unique Product Features:** Supplies 5 strains of beneficial bacteria to reduce the need for birdbath and fountain maintenance and water changes by biologically cleaning and clearing water. All-season formulation keeps on working week after week, month after month.

#### **Product Rationale**

Combining different strains of synergistic bacteria (approximately 750 million colony forming units per milliliter) achieves a formulation that can be used to keep ponds clean and clear during the entire year. Other products can only be used when the pond warms up in spring, for example. **LoveBirds Birdbath Cleaner** reduces the need for water changes and laborious maintenance tasks, like sludge removal, by supplying carefully selected bacterial strains.
