## CALA-fin Marine Zooplankton

### CALA-fin Liquid Marine Zooplankton

- All natural marine copepods
- Packed with nutrition
- Enhances growth and color for fish, corals, fry, and invertebrates

**CALA-fin Liquid Marine Zooplankton** has been formulated to meet the needs for the aquarist who wants a zooplankton food in convenient liquid form. Protein-rich *Calanus finmarchicus* copepods from natural marine waters are an ideal food for many tropical fish, both freshwater and marine. CALA-fin Liquid contains both whole freeze-dried copepods and oil-free copepod meal perfectly proportioned for regular feeding without adding unwanted dissolved organic matter to the aquarium.

## CALA-fin LIQUID

**AquaLife CALA-fin Liquid** contains 100% natural copepods that provide top-quality protein, omega-3 fatty acids, and anti-oxidant compounds important in the diet of marine organisms. CALA-fin supplies great nutrition for all marine and freshwater fish that feed on plankton, as well as all types of corals, other filter feeders, and all fish larvae.

Size: 8oz and 16oz sizes.

Contents: Water, whole *Calanus*, *Calanus finmarchicus* copepod meal, acetic acid, sodium chloride, magnesium sulfate, potassium sorbate, Vitamin C.

**Directions:** Shake well. Add 1 teaspoon (5 ml) per 25 gallons net aquarium capacity daily. Observe response of the organisms and adjust feeding quantity appropriately. Use a dropper to feed individually, or add directly to the aquarium in an area of high water movement. Some corals feed better at night, so day and/or night feedings are recommended. Because every aquarium is different, we recommend adjusting feeding practices based on the response of the organisms in the tank. Four to five feedings per week is a typical schedule. Does not require refrigeration. Shelf life 2 years from date of purchase.

Store tightly sealed in a cool, dry place.  
For Aquarium Use Only.  
Not for human consumption.  
Keep out of reach of children.
